

LH-Pro is an extract manufactured exclusively for Vitobest® from tribulus (*Tribulus terrestris*) of the highest purity found: with 90% saponins and 40% protodioscins. Capsules.

DESCRIPTION

- Tribulus extract (*Tribulus terrestris*).
- 90% saponins and 40% protodioscins.
- Precursor of sexual hormones.
- Helps induce testosterone production.
- Suitable for people with celiac disease.
- Vegetable capsules suitable for vegan diets and free of titanium dioxide.

Some scientific research reports that steroidal saponins are a safe and health-authorized plant component that, although they have shown various biological activities (antimicrobial, insecticidal, expectorant, diuretic, cardiovascular, anti-inflammatory, sedative, etc.) ¹, have been established for a long time as precursors of sex hormones ².

Others report that this herbaceous plant can also induce testosterone production once ingested ³.
