

Calendula Diaper Cream 75 ml

EAN: 4001638098311 FABRICANTE: WELEDA

This protective cream has been formulated to protect the skin of the baby's bottom from the first day, relieving irritation and preventing the appearance of redness. In addition, its regenerating formula helps soothe and repair reddened and sensitive skin in the diaper area. The cream forms a protective barrier that insulates the skin from moisture and irritating agents, keeping the baby's bottom always protected and comfortable. It is recommended to apply at each diaper change.

DESCRIPTION

What is weleda Calendula Diaper Cream for?

Calendula Diaper Cream is highly valued by parents who have used it, who nickname it "Hand of Saint", due to its effective properties to prevent, soothe and regenerate irritated and reddened skin in the diaper area. The cream protects and cares for the baby's delicate epidermis in a completely natural way. Its formula contains zinc oxide, which acts as an insulator and absorbent, while beeswax forms a fine protective layer that does not clog pores. In addition, organic extracts of calendula and chamomile soothe and hydrate the skin, reducing inflammation and redness. It should be noted that Weleda Beb e is the No. 1 product recommended by midwives in Germany within the category of baby care products, according to an independent market study carried out in 2019.

What are the benefits of weleda Calendula Diaper Cream?

The cream has properties that soothe and regenerate red and irritated skin in the diaper area, leaving the baby's skin soft and healthy. In addition, it acts as a protective barrier that keeps the skin of the bottom isolated from moisture, keeping it protected and dry.

What are the ingredients of Weleda Calendula Diaper Cream?

- Water
- Sweet almond oil: Sweet Almond Oil is a fine and light oil, which is characterized by its high skin tolerance. It is especially suitable for sensitive, rough, dry or scaly skin, making it ideal for babies and young children. This oil contains a high proportion of unsaturated fatty acids, such as oil and linoleic acid, which makes it especially nourishing for the skin. These fatty acids help keep skin hydrated, soft and supple, making it a popular skin care choice for people of all ages.
- Sesame oil
- Zinc oxide

Calendula Diaper Cream 75 ml

EAN: 4001638098311 FABRICANTE: WELEDA

- white beeswax
- Lanolin
- glyceryl linoleate
- Clay
- Calendula Flower Extract: The flowers of the Calendula plant are easily recognizable by their orange color. These flowers contain carotenoids, flavonoids and saponins, which provide softening properties and help in skin regeneration. Thanks to this unique combination of natural ingredients, Calendula is widely used in skin care products and has been shown to be effective in treating various skin conditions.
- Chamomile flower extract
- natural essential oils
- limonene
- linalool
- benzyl benzoate
- benzyl salicylate
- natural essential oils

How should weleda Calendula Diaper Cream be used?

To use the diaper cream, it is important that the baby's skin is clean and dry before applying it. Spread the cream evenly over the irritated bottom to create a protective layer that will keep it protected from moisture for longer. If the skin is very red or irritated, it is advisable to apply the cream every time the diaper is changed. To keep the skin healthy, it is important to change the diaper frequently, at least after each feed. It is recommended to clean the area with water and a soft sponge at least once or twice a day. At night, diaper cream can be used as a preventive measure, since the number of changes is usually less. Our midwife recommends using the cream on the newborn's skin folds after bathing, as this area is difficult to dry properly and can cause irritation. Diaper cream has a soothing and cleansing effect on these areas, which can help prevent skin irritation.
