How should Calendula Shampoo and Shower Gel be used?

Guidelines for washing the baby from head to toe: Apply the cleaning product and lather gently, then rinse well. To wash the body, use a natural sponge and start with the neck, moving on to the chest, tummy, arms, genitals and legs, paying attention to the folds of the skin. Then, turn the baby over and wash his back, being careful not to get his face wet. To wash his little head, avoid getting the soap in his eyes. Rinse the face with water only, and if necessary, use saline solution and sterile gauze pads to clean the eyes from the inside out. Do not wash the nose and ears, except if the baby has congestion.
