

## Salvia balm for gums 30 ml

EAN: 4001638088060 FABRICANTE: WELEDA

Salvia Gel is a soft refreshing gel that has been designed to care for and strengthen sensitive gums. This gel is a perfect solution for after brushing, as it protects and soothes delicate gums, making them more resistant. In addition to providing a pleasant sensation of freshness in the mouth due to its mint flavor.

### DESCRIPTION

#### What is Weleda Sage Gel used for?

This gel is a soft and refreshing product that is used after brushing to protect and soothe delicate gums, making them more resistant. Contains extracts of medicinal plants such as sage and chamomile, which help regenerate the tissues of the mouth. This gel is especially beneficial for pregnant women, teething babies, smokers and denture wearers. In addition, it helps to alleviate oral irritations, to regenerate damaged tissues and to reduce bad breath.

#### What are the benefits of Weleda Salvia Gel?

Salvia gel soothes and protects delicate gums, strengthening them in the process. It is especially recommended for pregnant women, teething babies, smokers and users of dental prostheses, as it helps to care for their gums effectively. In addition, it is suitable for celiacs, making it a safe option for people with this condition.

- linalool

### How should Weleda Sage Gel be used?

To use this gel, after brushing your teeth, it is recommended to apply approximately 1 cm of gel and gently massage the gums for 1 minute, using the brush or fingertips. For best results, it is recommended not to rinse your mouth with water after using the product, as this may reduce its effectiveness.
