

White Mallow Diaper Cream 50 ml

EAN: 4001638096652 FABRICANTE: WELEDA

This cream is indicated for the care of the bottom of babies with hypersensitive and atopic skin. Its gentle and natural formula soothes and regenerates irritated skin in the diaper area, relieving redness and protecting against irritation.

DESCRIPTION

What is weleda Malva Blanca Diaper Cream for?

This protective cream is designed to promote healthy skin development in the baby's diaper area. Its gentle and effective formula calms and regenerates irritated skin, as well as protecting it against humidity with the help of natural zinc oxide. The BIO White Malva extract is especially valuable, as it soothes hypersensitive skin and prevents itching, ensuring that the baby feels comfortable. Organic coconut and sesame oils strengthen the skin's natural protective functions, and best of all, this range is free of essential oils and fragrance.

What are the benefits of weleda Malva Blanca Diaper Cream?

This protective cream helps soothe and regenerate irritated skin in the diaper area, while keeping it protected and isolated from moisture.

- Wild Pansy Extract
- Fatty acid esters (emulsifier)
- Sodium Caproil/Lauryl Lactylate (vegetable emulsifier)
- Lactic acid

How should weleda Malva Blanca Diaper Cream be used?

To correctly apply the diaper cream, first make sure that the baby's skin is clean and dry. Then, spread a layer of diaper cream over the diaper area in such a way that a visible protective layer is formed, which will keep the baby's bottom isolated from moisture for longer. If the baby has very irritated and red skin, it is advisable to apply the diaper cream every time the diaper is changed. To keep the skin of the diaper area healthy, it is recommended to change the diaper after each feed, and clean the skin with water and a soft sponge at least once or twice a day, making sure to dry the area well and paying special attention to the crease areas. At night, apply the diaper cream as an additional protection measure, since the number of diaper changes is usually less.
