

C.L.A + is a food supplement from Inovance Laboratories based on safflower seed oil, which is rich in CLA conjugated linoleic acid, and guarana, for an action on the loss of adipose tissue, and with chromium to regulate the metabolism of Carbohydrates.

DESCRIPTION

I have gained weight, especially in the belly. What can I take? If you have gained weight and want to eliminate the excess belly, you can take C.L.A+, which is clinically proven in the loss of fat mass. You should use it as part of a program that includes a reduction in caloric intake and an increase in physical activity. You should take two pearls in the morning and two pearls at noon or at night as a shock treatment. And, in case of maintenance you should take two pearls a day.

I don't like my figure. What can I take? If you don't like your figure and you want to lose some weight because you have localized fat in your hips, thighs and belly, and therefore you want to reshape your figure, take C.L.A+. You should take two pearls in the morning and two pearls at noon or at night with a glass of water. You should take C.L.A+ with a program that includes reduced caloric intake and increased physical activity.

C.L.A+ is not recommended for pregnant women, infants, or children. Contains caffeine.

C.L.A+ contains a Tonalin concentrate, which is a natural extract of safflower seeds that contains 80% CLA, whose action is clinically proven in losing fat mass.
