

Flexivance is a food supplement from Inovance that is used for the renewal of cartilage, muscles and for protein synthesis. Flexivance contains marine collagen peptides, zinc, magnesium, vitamin C and vitamin D.

DESCRIPTION

I have joint pain, both at rest and after a sports activity. What can I take?

If you have joint pain at rest or after sports activity, you should take Flexivance from Inovance to help take care of your muscles and joints. You must dilute two measuring spoons in 200ml of water, mix well and consume immediately.

I want to recover better after doing sports. What can I take?

If you want to recover better after playing sports you should take Flexivance and Inovance. Flexivance is recommended for athletes who want to take care of their muscles and joints. Flexivance provides 5 grams of hydrolyzed marine collagen per day. You must dilute two measuring spoons in 200 ml of water, mix well and consume immediately.
