

Glutavance is a food supplement from Inovance laboratories. Glutavance is indicated to protect the intestinal wall in case of intolerances. It has the sport protect certification, that is, the absence of doping substances is guaranteed.

DESCRIPTION

I have a food intolerance, what can I take?

If you have food intolerance you can take Glutavance, which is a food supplement based on glutamine, zinc and vitamin D. Glutamine is an essential amino acid for the cells of the intestinal wall. You should take one scoop in 100 ml of water or two scoops in 200 ml of water, mix well and consume immediately.

I have frequent sports training and I get tired. What can I take?

If you are an athlete and you get tired with daily training, you can take Glutavance, which is glutamine, protects the intestinal wall and promotes the immune system. In addition, it has the Sport Protect guarantee, that it is not a doping substance and has a mild lemon flavor. You should take one scoop in 100 ml of water or two scoops in 200 ml of water, mix well and consume immediately.
