DESCRIPTION

What is Noctivance and what is it used for?

Noctivance capsules from Inovance is a food supplement based on melatonin, amino acids, vitamins and minerals. Noctivance contains highly absorbable marine magnesium to help reduce fatigue. Noctivance exerts a continuous action throughout the night.

Each Noctivance capsule contains 1.9mg of melatonin, combined with walnut extracts, naturally rich in melatonin. Noctivance is non-addictive and time-release.

What can I take if I have sleep problems?

If you have sleep problems, you should take Noctivance, which, due to its melatonin content, will help you sleep well.

What should I take if I wake up at night?

If you wake up at night, you should take Noctivance, which, as it has a prolonged release melatonin, will prevent you from waking up at night.

I have a hard time waking up in the morning. What can I take?

If you have a hard time waking up in the morning, you should take Noctivance, which, thanks to its marine magnesium content, will help reduce your fatigue and you will wake up in the morning without problems.

How should I take Noctivance?

Noctivance is taken orally, one capsule in the evening, one hour before bedtime.

Does Noctivance have contraindications?
