DESCRIPTION

What is Probioavance Instan and what is it used for?

Probiovance Instan de Inovance is a food supplement based on five probiotics, fiber and vitamin C. It contains sweeteners. Probiopack technology offers the guarantee of the selection and viability of the strains for optimal efficiency.

Probiovance Instan is indicated for diarrhea in children from three years of age and for the restoration of the intestinal flora.

How should Probioavance Instan be taken?

One stick should be taken daily, outside of meals.

For children from three years of age, the stick must be reconstituted in a semi-liquid food. For older children: Open the stick and put the powder directly into the mouth without the need for water, although it can be used if desired. Probiovance Insta has a natural aroma of red fruits.
