Inovance Reduflat is a food supplement rich in 2.1 billion CFUs per two capsules. The energetic action of probiotics and plant extracts means that fermentation gases are better absorbed.

DESCRIPTION

What is Reduflat and what is it used for?

Reduflat is a food supplement based on three lactic acid bacteria, plant extracts and prebiotics.

Reduflat serves to reduce spasmolytic effects and flatulence thanks to fennel, clay and charcoal.

I have heavy digestion, what could I take?

If you have heavy digestion, it would be good for you to take reduflat, which due to its composition of lactic acid bacteria, plant extracts and prebiotics will help you digest food better and that these digestions are not so heavy.

I have gas, I feel bloated, what can I take?

If you have gas, a great anti-flatulence product is Reduflat, which among other components contains fennel, which is excellent as an anti-flatulence.

I have flatulence, especially with certain fruits and vegetables. What can I take to feel better?

If you suffer from flatulence depending on what vegetables or fruits you eat, Reduflat is especially indicated, since its composition is ideal for this type of gas, in addition to fennel, it contains activated carbon, excellent for gases.

How should I take Reduflat?

Reduflat is taken by mouth: You should take reduflat after eating. One capsule at noon and one capsule at night.
