FABRICANTE: YSONUT

Tolerance is a food supplement from Inovance that is used to treat intestinal permeability disorders and alterations of the intestinal mucosa, as well as food intolerances, allergies, colitis and migraines.

DESCRIPTION

What is Tolerance and what is it used for?

Tolerance is a food supplement based on glutamine, zinc, vitamin D and chlorella. Tolerance is adapted to all people with intestinal permeability disorders, food intolerances, allergies, colitis and migraines.

Tolerance contains rosemary that exerts anti-inflammatory action on the intestinal mucosa, and vitamin D that offers intestinal immunity.

Does Tolerance have contraindications?

Tolerance is contraindicated in pregnant women and is not recommended in children.

How should I take Tolerance?

Tolerance is taken orally: Take three tablets a day, one tablet in the morning, one tablet at noon, and one tablet in the evening, with a glass of water.
