FABRICANTE: YSONUT

Transit de Inovance is a food supplement whose synergistic association of prebiotic fibers and vegetable fibers: apple and plum make transit serve to treat constipation, irregular transit.

DESCRIPTION

What is Transit and what is it for?

Transit is a food supplement based on plum and apple fibers, and prebiotic fibers: fructooligosaccharides, for transit and intestinal flora.

I have irregular, slow traffic, what could I take?

If you have a slow, irregular transit, you can take Transit, which, due to its content in dietary fiber, will help regulate your intestinal transit.

I am often constipated, especially when traveling. What should I take?

If you travel often and suffer from constipation, you can take Transit, which are dietary fibers that will help regulate your intestinal transit.

How should I take Transit?

Dilute in a large glass of water. It is advisable to reconstitute in a shaker. It can be used punctually. One or two can be taken daily, in the morning or at night, with a glass of water.
