

Vitamin K2-D3 is a food supplement rich in vitamin K2, vitamin D3 and vitamin MK7. Vitamin K2-D3 from Inovance serves for mineralization and bone mass and to maintain the health of the cardiovascular system.

DESCRIPTION

What is Inovance Vitamin K2-D3 and what is it used for?

Vitamin K2-D3 from Inovance is a food supplement based on metaquinone or vitamin K2 and vitamin D, vitamin MK7, which is a patented vitamin K2, which is beneficial for bone health and for maintaining the health of the cardiovascular system.

I am in menopause and I want to maintain my bones. What can I take?

During menopause the bones are more fragile and weak, so calcium and vitamin D are important. If you are in menopause and want to maintain your bone health, it would be good to take vitamin K2-D3. The dose that you should take is one pearl a day during dinner, with a glass of water.

My teeth are demineralized, what could I take?

If you suffer from dental demineralization, it would be recommended to take vitamin K2-D3. Vitamin D3 is important for calcium binding to bones and will help mineralize your teeth. In this case, you should take one pearl a day during dinner, with a glass of water.

I have a hard time repairing my bones after a fracture. What should I take?

If you have suffered a bone fracture and it is difficult for you to repair it, it is because calcium does not fix well in the bones and for this it is advisable to take Vitamin K2-D3. In this case, you should take one pearl a day during dinner and with a glass of water.

For whom is vitamin K2-D3 indicated?

Inovance's vitamin K2-D3 is indicated for those older people and women in menopause who need bone mineralization and maintain cardiovascular health.
